

PHILOSOPHERS FOR SUSTAINABILITY 

PHILOSOPHY & THE CLIMATE CRISIS

APRIL 29, 2023 | ZOOM

Climate change presents a major challenge for our time. It is expected to greatly increase global temperatures, “natural” disasters, political instability, war, disease, drought, and famine in this century. Its impacts are far-reaching and distributed unequally. Building on our 2021 conference, this day-long conference aims at making progress in practice. Join us! To learn more and register visit:

www.philosophersforsustainability.com/conference2023.

With interactive workshops and panels on:

Teaching & Climate Curriculum Development

Shifting Academic Institutions

Public Climate Philosophy

Strategic Planning
